

ANALYSIS OF JEE (ADVANCED)-2016 – PAPER-2

The format of the JEE (Advanced)-2016 Paper-2 is drastically different as compared to previous year. There are more single option correct questions as compared to previous year. The matrix match questions are missing. Also the paragraph based questions are single option correct whereas in previous year, they were multiple answer correct.

In Chemistry, the difficulty level is moderate. There are at least 4 questions which are difficult for students to analyse. Section wise distribution is as follows: Inorganic Chemistry – 5 questions, Organic Chemistry – 7 questions, Physical Chemistry – 6 questions. It will be difficult to score 85%.

In Mathematics, Paper-2 is comparatively easier than Paper-1. The overall paper of mathematics is balanced. The paper did contain a couple of tricky questions. Calculus part was very nice. Major portions are calculus and co-ordinate geometry, 12th portion dominated over 11th.

The Physics section was the most difficult of the 3 subjects. It contained 2 ambiguous questions as well. Average score expected is very less, should be around 33%. The mechanics portion is especially tougher.

Overall the paper has been difficult for an average student.
